**Re: Chartiers Valley School District
Pressure Reducing Valve Proposal**

Dear Ms. Connolly,

Thank you for this opportunity to provide engineering design services for Chartiers Valley School District. As previously discussed, our proposal will be for the bidding of an in-line pressure reducing valve (PRV). The PRV will be installed in a concrete vault with required appurtenances and valves. The location will be determined during our design process.

RVE will provide plans and specifications that will allow you to advertise this project in accordance with public bid laws. In addition, RVE will approve all contractor required shop drawings, respond to RFI's, and attend a pre-construction meeting.

We propose to complete the services as a lump sum fee of **\$7,375.00**.

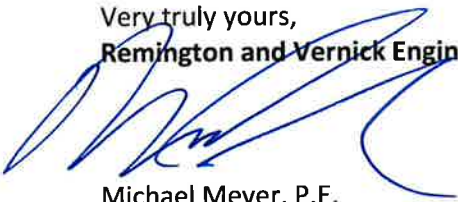

The following items are excluded from this proposal.

1. Geo Tech (we will use previous reports).
2. Environmental Permitting.
3. Construction Inspection.

Once again, thank you for this opportunity.

Should you have any questions please feel free to contact our office at (412)-263-2200.

Very truly yours,
Remington and Vernick Engineers
